## **1 Honours project**

Using Raspberry pi device to measure temperature variation against ground depth.

## **2 What I would like to learn in the module**

I would like to learn programming languages from the module. I think it will help me a better postgraduate with knowledge of programming. It will actually easy up my life.

## **3 How can you list all files in a directory, with most recent one displayed first**

Use "ls -rt".

## **4 How can you display the first 25 lines of a file?How can you display just lines 16 through 25?**

Use "head 25 'file name'" to display first 25 lines of that file. Use "tail -7 'file name'" to display last 7 lines, which is basically lines 16 through 25.

## **5 Sometimes there are multiply man pages with the same name. How can you display them all?**

Use "man man" terminal commmand.
